

Pulp Clamp

Pulp Clamps - There are many other lift truck attachments that can be utilized so as to make forklifts far more useful. Snowplow accessories could be mounted onto the front of a lift truck. A scoop bucket could be helpful when the job requires transferring sand, gravel, soil or snow. A double block handler allows the person operating the forklift to pick up 2 loads and pile them beside each other. Many of these attachments are extremely excellent for light to medium duty work.

One of the forklift attachments, referred to as a package lift clamp, allows for the transferring and carrying of heavier pallets. Pallet crane forks are also utilized in order to move and lift pallets by utilizing an overhead crane. A drum clamp accessory is useful for moving really heavy drums from place to place without having to use a pallet. Forklift mounted hoppers permit materials to be transferred and dumped without having to handle it manually. These hoppers are self dumping when the bumper is released.

There are also accessories available which could transform the lift truck right into a commercial broom or mop. Those attachments are perfect for cleaning boat docks, storehouse flooring and parking lots. Forklift mounted platforms come geared up with dual entry doors and can be hooked up to transport employees from one site to another. The mounted platform accessory is great for reaching parts that are hard to access, particularly when you have products or stuff stored in out of the way areas or really up high.

Attachments could be a very valuable piece of equipment when put in a lift truck, transforming an typical forklift into a mobile hoist unit. It's most useful when transferring unstable or difficult loads. This attachment could either be telescopic, mounted on the carriage itself, or be connected or even lift truck mounted.
