

Aerial Work Platforms

Aerial Work Platforms - There are lots of attachments designed for lift trucks which can be used so as to help expand the capabilities of your forklift and allow you to pick up stuff, handle materials with greater ease or to accomplish clean-up tasks.

Some accessories were specially designed for the blades themselves. For example, fork extensions could be used whenever you require more fork length, which increases lifting capability. Fork extensions come in lengths varying from 48-120 inches. Rounded or triangular accessories are another variety utilized if moving rolled material so as to make sure it does not roll off of the typical flat blades.

Examples of lifting accessories consist of pivoting and telescoping crane or boom attachments. They can come in a number of different kinds and are usually utilized for transferring metal bars, lumber, poles and different sort of bulky things. Additional accessories like for example different styles of hook plates and hooks are presented to carry items making use of a sling or chain. Slab filters and magnetic filters are other objects that could be utilized together with hook attachments. Slab lifters are specialized attachments which are utilized for lifting a variety of materials which are delivered in a slab or sheet format. Carpet poles and rug rams are other lifting tools that connect to your lift truck to be able to make transferring rolls of carpet easier. The accessory hooks onto the lift truck's forks and has a pole which goes through the center of the carpet roll.

There are several types of forklift attachment meant for facility maintenance such as snow blades. These industrial forks can be connected to front end loaders and used for transferring materials like for instance mulch, snow as well as dirt. Other popular cleanup accessories comprise magnetic sweepers and standard sweepers. Standard sweepers comprise a broom which the lift truck blades connect onto for sweeping big spaces like for example factory floors, parking lots and warehouse. The magnetic sweeper is the same except that it has a magnetic plate instead of bristles. The magnetic sweeper is used in areas where there is lots of metal fragments such as on shop floors for instance. Sweepers have widths as much as sixty inches and this surface area makes clean up quick and easy.

A material spreader is another lift truck accessory that is usually used at facilities. These spreaders are helpful for a variety of applications like for instance spreading rock salt, pellets, fertilizers, insecticides, seed and ice melt.

Work platforms are another optional lifting attachment which many companies make use of daily. The platforms range in size from 36" x 36" to up to 60" x 60". There are several units presented that are capable of folding up and storing into a smaller space. Work platforms are designed to raise staff up to an overhead location with the use of the lift truck. Larger platform units have extra space for workers to bring tools and other necessary objects for the task. Usually work platforms are constructed of poly material or steel.
