

Forklift Electrical Parts

Forklift Electrical Parts - Forklifts together with various forklifts can have particular labels for use in certain hazardous locations. The mark denotes that this certain model of lift truck meets the minimum standards of ANSI/UL 553 intended for electric lift trucks or ANSI/UL 558 used for internal combustion engine lift trucks.

The application for labels meant for lift lift trucks may be found in National Fire Protection Association NFPA 505 - Powered Industrial forklifts including: Maintenance and Operation, Type Designations, and Areas of Use. Consult your local insurance carrier and Fire Marshall for more info concerning the approved uses of industrial powered trucks in your application.

If the specific lift truck meets the outlined standards, labels could be placed. A labeled lift truck would show the type of designation put on the nameplate and will have a properly corresponding label attached.
