

## PowerBoss Part

PowerBoss Parts - The first vacuum cleaners were created in the 1860's. Fortunately, floor cleaning devices and scrubbers have significantly evolved since then. Daniel Hess created the very first carpet sweeper in Iowa, USA. His model had a rotating brush together with an intricate system of bellows situated on top to produce suction. We are lucky nowadays that scrubber equipment and vacuum cleaners need much less effort to work and are electrically driven.

### The 4 Key Types of Floor Scrubber

At present, there are four main types of floor scrubbing devices available on the market. Each of them has their own individual features which make them ideal for other work environments and market sectors. Several models are battery operated, several are compact and could be easily packed away and kept, several models are a ride-on kind. The typical model is where the operator walks at the back of the machine and guides it around the place that needs scrubbing. There are even floor scrubbing equipment proficient at cleaning big places all on their own because they have an artificial or computer mind. These automatic models could be programmed to work without an operator.

#### 1. Fold-away Floor Scrubbers

Fold-away floor scrubbers are perfect in small companies where space is limited. Vacuums and floor cleaning equipment must be packed away efficiently in storage areas and small cupboards. This is when the folding equipment kind comes in handy. With this type of floor scrubber, the main arm which is used to maneuver the equipment can be folded in several places, making the equipment compact whenever it is not being utilized.

#### 2. Mains & Battery Operated

Even if Mains operated floor scrubbers are the most common, the battery operated version is ideal for environments where the accessible power sockets are some distance away from the floor that needs scrubbing and extended power leads are not available. The battery operated model is best suited for small areas like for instance washrooms with hard to reach areas that would be difficult to clean with a trailing power lead. The battery could be charged and used for about 4 hours before re-charging is needed. The battery can even be replaced if necessary.

#### 3. Ride-on or Walking machines

The ride-on machine is a great choice if the floor scrubber you need is for big areas like for example inside of warehouses or retail interiors. This model allows the worker to steer the machine all-around obstacles and corners easily and efficiently in view of the fact that the operator has a good vantage point. These kinds of floor scrubbing equipment come equipped with a two hundred fifty liter water tank and an equivalent tank to accumulate the filthy water. Walking machines are similar models that could be operated by anyone walking at the back of the machinery and steering the scrubber.

#### 4. Robotic Floor Scrubber machines

A robot floor scrubber can be another option to consider. These designs are ideal if you need a high specification floor scrubber to clean a big area that has minimal obstacles. These models have sensors installed to be able to allow the equipment the ability to steer clear of stairs, humans, doors and walls. It can accomplish the cleaning job without difficulty once you start the unit up and set the course, it would clean all by itself. These floor scrubbers are capable of cleaning a thousand square feet with every 4 hour charge.

### Floor Scrubbing Technology

There are different floor scrubber models available on the market these days with selling points and unique features. Businesses can keep their floors clean by finding the model that best meets all their needs.

In summary, the foldable scrubber is perfect for accessing unreachable and small places like for instance the washrooms, while the ride-on version of floor scrubber can provide the worker with more visibility and comfort. Additionally, ride-ons are proficient at cleaning many hours without a charge or refill. Robotic models permit the cleaning to happen all by itself, enabling individuals to accomplish duties somewhere else. Battery operated floor scrubbers are best suited for cleaning places away from power sockets. These models have the extra benefit of not getting the power lead twisted around door frames or under the machine.
